

ALTHAF HUSSAIN SYED

DevOps Engineer | Cloud & Platform Engineer | 3.10 Years at DXC Technology

✉ althafhussain.sd@gmail.com | +91 8184812249 | [linkedin.com/in/althafhussainsyed](https://www.linkedin.com/in/althafhussainsyed) | althafportfolio.site

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 3.10 years at DXC Technology, specialising in AWS infrastructure automation, Kubernetes platform engineering, and enterprise-grade CI/CD delivery. Led daily deployment pipelines for a 6+ member engineering team across 3 concurrent production projects — reducing manual deployment effort by 70% and improving release reliability across multi-environment AWS infrastructure. Hands-on across Terraform, Amazon EKS, GitHub Actions, Jenkins, Docker, CloudWatch, Prometheus, and Grafana. AWS Certified Solutions Architect – Associate, with additional certifications across GCP, Azure, and AI Practitioner. Recipient of two DXC CHAMPS Awards for consistent delivery excellence and operational accountability.

PROFESSIONAL EXPERIENCE

DXC Technology | DevOps Engineer | Cloud & Platform Engineer

Aug 2022 – Jun 2026

Cloud-Native Kubernetes Platform on Amazon EKS | AWS Managed Services | Mar 2024 – Apr 2026

- Provisioned **Amazon EKS clusters** across dev, staging, and production using **Terraform** — reducing environment spin-up time by ~60%; reusable modules cut IaC duplication by ~50% across 3 projects.
- Built **GitHub Actions CI/CD pipelines** handling **daily deployments** — integrating Amazon ECR, Trivy container security scans, and automated rollback triggers; reduced build-to-deploy cycle by ~35%.
- Configured **Kubernetes HPA and Cluster Autoscaler**, maintaining **99.9% uptime** across a 2-year production run with zero unplanned downtime incidents in a multi-environment enterprise setup.
- Integrated **CloudWatch, Prometheus, and Grafana** dashboards for real-time observability — reducing mean time to detect (MTTD) anomalies by ~40% and enabling proactive incident response.

Cloud-Native CI/CD Automation Platform | Jul 2023 – Feb 2024

- Designed and maintained **Jenkins and GitHub Actions** pipelines for daily multi-service deployments — integrating **Maven, SonarQube, Docker, and Amazon ECR**, reducing release cycle time by ~35%.
- Implemented **Blue-Green and Rolling Deployment** strategies via AWS Developer Tools — eliminating deployment downtime and reducing failed release rollbacks by ~50% vs. the previous approach.
- Integrated **SonarQube quality gates + Trivy scans** at every pipeline stage — blocking non-compliant builds before production; improved codebase quality score by ~25% over 7 months. Enabled **CloudWatch** alerting and Slack notifications, cutting incident detection time by ~30%.

Enterprise Cloud Migration & Modernization Platform | Nov 2022 – Jun 2023

- Provisioned **Amazon VPC** (subnets, security groups, route tables, IGW/NAT) for a 3-tier architecture across 2 AZs — supporting a full legacy-to-cloud workload migration for an enterprise client.
- Implemented **Auto Scaling Groups and Application Load Balancers** — enabling the platform to handle traffic spikes automatically while maintaining **99.9% uptime** during peak production loads.
- Configured **Amazon RDS, RabbitMQ, and Memcached**; automated full environment provisioning using **Bash scripting and Terraform IaC** — reducing environment setup time from days to under **2 hours**.

Core Roles & Responsibilities

- CI/CD & Automation:** Owned Jenkins and GitHub Actions pipelines processing daily deployments across microservices — integrating Maven, SonarQube, Docker, ECR, and Trivy; **reduced manual effort by 70%** across 3+ years.
- Cloud Provisioning & IaC:** Provisioned and managed AWS services (EKS, ECS, EC2, RDS, S3, VPC, IAM) using Terraform IaC; deployed containerised workloads across Docker, Kubernetes, Amazon ECS, and Amazon EKS environments.
- Monitoring & ITIL Operations:** Maintained production observability via CloudWatch, Prometheus, Grafana, and Dynatrace; managed all incidents and change requests through ServiceNow — **zero missed CAB approvals** across 3+ years.
- Collaboration & Documentation:** Coordinated dev, QA, and infra teams through Agile sprints; authored SOPs and operational runbooks that improved deployment consistency and reduced onboarding time across the 6+ member team.
- AWS IAM & Security:** Implemented IAM roles, security groups, and least-privilege access policies for AWS services and CI/CD pipelines, improving deployment security while ensuring controlled access across development and production environments.

KEY ACHIEVEMENTS & AWARDS

- **DXC CHAMPS Award – FY24 Q1:** Recognised for consistent delivery, ownership of priority tasks, and reliable execution of infrastructure operations and production deployments across the 6+ member engineering team.
- **70% Manual Effort Reduction:** End-to-end CI/CD automation eliminated ~70% of manual deployment steps across Jenkins and GitHub Actions — improving delivery speed and release consistency across all 3 projects.
- **ServiceNow Dashboard:** Developed a custom incident tracking and SLA breach reporting dashboard — improving operational transparency and reducing incident response lag across the engineering team.
- **DXC CHAMPS Award – FY26 H1:** Awarded for sustained performance, end-to-end accountability, and operational excellence in supporting critical production infrastructure services throughout tenure.
- **Security & Quality Integration:** Integrated SonarQube quality gates and Trivy container scans across all pipelines — blocking non-compliant builds and improving overall code quality score by ~25%.
- **Personal AI Platform (Live):** Independently designed, built, and deployed an AI-powered portfolio at [althafportfolio.site](#) — Terraform + AWS + Docker + GitHub Actions, fully automated from code to live production.

TECHNICAL SKILLS

Cloud Platforms: AWS (primary), GCP, Microsoft Azure	Monitoring & Observability: CloudWatch, Prometheus, Grafana, Dynatrace
IaC & Automation: Terraform, Ansible, Bash Scripting, Python, YAML	Source Control: GitHub, GitLab, Bitbucket
Containers & Orchestration: Docker, Kubernetes (EKS, ECS), Helm	Artifact Repositories: Nexus, AWS CodeArtifact, Amazon ECR, Docker Hub
CI/CD Pipelines: Jenkins, GitHub Actions, GitLab CI, AWS CodePipeline, Blue-Green & Rolling Deployments	Networking: VPC, Subnets, Security Groups, Route 53, ALB, NAT/IGW
Build & Quality: Maven, SonarQube, Checkstyle, Quality Gates, SDLC Collaboration	ITIL & Collaboration: ServiceNow, CAB, Agile/Scrum, SDLC, Cross-functional Coordination
Security: Trivy, Shift-Left Security, IAM, VPC Security Groups, ACM	Linux Administration: Package management, user management, service monitoring, troubleshooting
Soft Skills: Leadership, Communication, Teamwork, Problem Solving, Time Management, Documentation	AI/ML & AWS AI Services: Gen AI/ML basics, AWS AI services, Prompt Engineering

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified AI Practitioner
- AWS Cloud Practitioner
- GitHub Foundations
- Google Cloud Professional Cloud Architect
- Microsoft Azure Administrator Associate (AZ-104)
- Microsoft Azure Fundamentals (AZ-900)

EDUCATION & PERSONAL PROJECT

Acharya Nagarjuna University M.Sc. in Computer Science (Dec 2022 – Jun 2024) B.Sc. in Computer Science (Jun 2019 – Jun 2022)	AI-Powered Portfolio & Content Automation Platform <i>althafportfolio.site Oct 2025 – Present Solo Project</i> ● Provisioned all AWS infrastructure (EC2, S3, Security Group, VPC, subnet) using Terraform — zero manual console clicks; full IaC from day one. ● Containerised services with Docker; automated CI/CD via GitHub Actions with environment-specific workflows, rollback support, Nginx + Let's Encrypt SSL for secure HTTPS hosting.
